

Public-Private Solutions for all your Science & Technology Facilities

From your initial idea to the opening of your new facility, we'll be there.

Our strategic partnership allows us to provide a unique, world-class service. From testing your facility's feasibility, to finding financial solutions, and delivering a new building our turn-key solution gives your organization the exact facility it needs—anywhere. And we can do all of this because our partnership is made up of two world-wide industry leaders.

A one-of-a-kind partnership creates a one-of-a-kind service.

In our respective fields, you'll be hard pressed to find companies with better track records than ours. And we're one of the few offering a turnkey solution. Together, we'll handle every detail.

CRB is an engineering, architecture, construction and consulting firm with experience in research, testing and teaching laboratory facility design and construction. ENR consistently recognizes our work, ranking us among the top science and technology firms.

BioReality, Inc. specializes in financing science and technology facilities. Our clients can vouch for the care we take in delivering cost-effective, state-of-the-art facilities.

One team to support you every step of the way.
