

A Turn-key Solution for all your Biomanufacturing Needs

From your initial idea to the opening of your new facility, we'll be there.

Our strategic partnership allows us to provide a unique, world-class service. From finding your facility's site to making sure it passes initial inspection, our turn-key solution gives your organization the exact biomanufacturing facility it needs—anywhere. And we can do all of this because our partnership is made up of two world-wide industry leaders.

A one-of-a-kind partnership creates a one-of-a-kind service.

In our respective fields, you'll be hard pressed to find companies with better track records than ours. And we're one of the few offering a turn-key solution. Together, we'll handle every detail.

CRB is an engineering, architecture, construction and consulting firm with experience in biomanufacturing facility design and construction. ENR consistently recognizes our work, ranking us 10th in industrial process design and 8th in pharmaceutical construction management.

BioReality, Inc. specializes in financing science and technology facilities. Our clients can vouch for the care we take in getting a facility up and running as soon and cost-effectively as possible.

One team to support you every step of the way.
